

The challenges we face to complete the task:

1. Gathering all the group members.
2. Choosing the food item.
3. Collecting necessary elements.
4. Last but not the least cooking the food.

Gathering all the group members:

As we all knew that all the members of our group are not in same section in other courses. It was very hard to find a common free time. But some how we managed a common free time and discuss about our plan.

Choosing the food item:

Choosing the food item was one of the difficult task that we got. Because we had very diverse options and we want to make an item which is not so common for a food festival. After hours of discussion we came to a decision that we will prepare two food item one is named biriyani and one is custard(which is a desert).

Collecting the necessary elements:

Collecting the necessary elements was a hard task but we did it without any problems. All most all of us has experience of grocery shopping that's why we passing this task is easy for us. For grocery shopping 5 of our group members went to local grocery shop other two member also want to came with us but unfortunately they are unable to came for their classes. Though grocery shopping is not new for us but this time we learn many new things as an example a fruit shop keeper wants to scam with us but by fortune we noticed that and caught him red handed. Overall it was a great experience for all of us.

Last but not the least cooking the food:

Tithi and Athena are the main chefs of our group. Tithi made the custerd and atehna cooked the birityani and they both showed the full process of cooking to us by video call .
